SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Redux, React Query, Material UI

Backend: Node.js, NestJS, Express.js, Supabase

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, RDS, ECS, ELB, SQS, SES), Docker, NGINX, CI/CD (CodePipeline), NX Monorepo

Payments: Stripe, PayPal, Cashfree

Testing: Jest, Mocha, Chai

Tools: Jira, Jenkins, Git

Architecture: Microservices Using Kafka, REST APIs, WebSockets, Micro-Frontend

EXPERIENCE

Senior Software Engineer

October 2022 - Present

Lanatus Systems

Ahmedabad, Gujarat, India

- Led backend and system design for scalable SaaS and live-streaming platforms used by thousands of users.
- Reduced AWS infrastructure costs by **66% (\$12K → \$4K/month)** through architecture optimization and resource tuning.
- Improved application **performance by 90%** by optimizing database queries, indexing, and frontend rendering.
- Designed microservices architecture using NestJS, Kafka, Docker, and PostgreSQL.
- Implemented subscription billing systems using Stripe (one-time + recurring payments).
- Built CI/CD pipelines with AWS CodePipeline, reducing deployment effort by 40%.
- Collaborated with product, design, and cross-functional teams to deliver major releases within tight timelines.

PROJECTS

Raspberry.ai

- An AI design assistant tool. Worked on a live startup tool, where I **built and managed the asset management system**.
- Contributed to managing and designing the complex state of the image editor.
- Resolved production bugs, including Sentry error fixes and other module improvements.
- **Technologies:** React.js, Supabase, Python, FastAPI

Retainly

- A contract and invoicing tool. Designed and developed scalable backend APIs for managing users, projects, contracts, templates, invoices and payment collection.
- **Built a fully customized editor** for contracts and created contract templates using the Tiptap editor.
- Managed different types of payments, such as one-time payments, installments, and recurring invoices.
- **Technologies:** Next.js, NestJS, PostgreSQL, Stripe, Shopify, Redis, BullMQ, Docker, NGINX

Apyhub

- A platform to test APIs like Postman using an editor similar to Notion. **Designed a standalone version** with features like **integration with JIRA, Confluence, GitHub Issues, and Postman**.
- **Created a CLI version** of Apyhub to test APIs on the cloud or in CI/CD. Added 5 integrations, 15 new screens, and 2 new versions of the app within 2 months.
- **Technologies:** React.js, Node.js, PostgreSQL, Docker, CLI, Yarn Workspaces

MansionVoyeyeur

- A Live streaming platform. **Generated underlying architecture for live video streaming and recording** using S3, EC2, RDS. Applied subscription and on-the-go payment using **Stripe, PayPal, Cash-free EmerchantPay**.
- **Recorded 50 cameras simultaneously with live streaming**.
- Reduced AWS costs by 66% from \$12,000 to \$4,000 per month.
- **Technologies:** Next.js, AWS (S3, EC2, RDS), Stripe, PayPal, Node.js, PostgreSQL.

EDUCATION

Bachelor of Engineering

Government Engineering College

Rajkot, 2018 - 2022

High School Diploma

Purohit Science School

Jamnagar, 2016 - 2018
